

Stratos 100G Transceivers

QSFP28 100G CWDM4 2km Transceiver

Features

- Hot-pluggable QSFP28 form factor
- 4 x CWDM – uncooled DFB laser
- (1271/1291/1311/1331 nm)
- PIN photo detector
- 0°C to 70°C case operating temperature range
- 2km transmission with SMF
- 3.3 V power supply
- Contain clock data recovery (CDR)
- Power consumption < 3.5 W
- Compliant with QSFP+ MSA SFF-8665
- Compliant with IEEE 802.3bm/100G-CWDM4 MSA specification
- Digital diagnostic functions (Via I²C)
- RoHS compliant
- Compliant with UL & TUV

Applications

- 100 Gigabit Ethernet, Dual LC, CWDM4

Note 1 : GND is the symbol for signal and supply (power) common for the QSFP+ module. All are common within the QSFP+ module and all module voltages are referenced to this potential unless otherwise noted. Connect these directly to the host board signal-common ground plane.

Note 2 : Vcc Rx, Vcc1 and Vcc Tx are the receiver and transmitter power supplies and shall be applied concurrently.

Laser Safety Information

All versions of this laser are Class 1 laser products per IEC/EN 60825-1. Users should observe safety precautions such as those recommended by ANSI³ Z136.1, ANSI Z36.2 and IEC 60825-1.

This product conforms to FDA (CDRH) 21 CFR 1040.10 and 1040.11 except for deviations of laser safety class designation pursuant to '[Laser Notice No.50](#)'

Product labeling:
Class 1 Laser Product
Compliance with 21 CFR
1040.10 and 1040.11

If labeling is not affixed to the module due to size constraints; then rather, labeling is placed on the outside of the shipping box. This product is not shipped with a power supply.

Caution: use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

(2) Within Europe the IEC standard has been adopted as a European Normative standard known as EN 60825, and each European country will have its own version of this standard, for example, the British Standards version known as BS EN 60825. There can be small differences between the different countries versions of EN 60825, and these are in part caused by the process of translating the standard into the native language of that country.
